

## TEACHER TALKING POINTS:

- Our actions are based on “preparation and prevent” not panic
- The goal is to minimize disruption of school and do our social duty to reduce the transmission of the virus
- EMPHASIZE BASIC SANITATION:
  - Wash hands for at least 20 seconds - every time
  - Use hand sanitizer
  - Avoid touching eyes, nose and mouth
  - Cough or sneeze into your elbow
  - Cover your cough or sneeze with a tissue and then throw the tissue away
- STAY HOME if you have symptoms - fever, cough, congestion
  - Be reasonable and don't take advantage of this
- Attendance is no longer a factor on final exam exemptions; it is being replaced for the balance of this year with “No missing assignments.” For the sake of clarity, here are the requirements to qualify:
  - 85% or higher in a qualifying class (ie not a class that is required to have finals)
  - No suspensions
  - No missing assignments
  - Tardy Policy for semester tests is still in place
- Be considerate of others
- Our emphasis is on prevention and reducing transmissions through reasonable steps
